Description

!!!SOLD!!!

This Beckman Coulter Avanti J-E High Performance refrigerated floor model centrifuge is a compact, energy-efficient centrifuge that delivers performance while saving valuable laboratory space. Ideal for cellular, genetic, or protein analysis. Features include a powerful, high-torque switched reluctance (SR) drive for fast separations, two acceleration and three deceleration rates, and a maintenance-free partial vacuum system that reduces friction on the rotor to generate less heat and consume less energy.

Max speed of 21,000 rpm, max capacity of 4 liters, temp range of -10C to 40C, 208/240V, 24 A, 60 Hz. Used, in excellent condition. Rotors not included but many available.
