Description

Fast and sensitive quantification of DNA, RNA, and Protein

The Invitrogen Qubit 4 Fluorometer is the next generation of the popular benchtop fluorometer designed to accurately measure DNA, RNA, and protein quantity. The new Qubit 4 also easily measures RNA integrity and quality. The easy-to-use touch screen menus make it easy to select and run the assays you need, with results displayed in just a few seconds.

Features:

More sensitive than UV absorbance-based quantification, making it ideal for precious samples

Accurately quantifies DNA, RNA, and protein in < 3 seconds per sample

Fast, reliable detection of degraded RNA with the new RNA IQ assay

Spectrophotometers: Invitrogen Qubit 4 Fluorometer

New integrated reagent calculator reports amount of dye and buffer needed
Uses as little as 1 µL of sample
Flexible options for exporting results: Wi-Fi, USB drive, or direct connection with a USB cable

Comes with our 90-day warranty.

Biotech Equipment Sales, Inc.: based in South San Francisco, the Biotech capital of the world, since 2009. We are dedicated to bringing high-quality pre-owned laboratory instrumentation to our scientific community.
