Description

The VWR Sheldon Model 2005 Refrigerated Incubator (Part # 9110567) is a compact, low-temperature incubator designed for applications such as B.O.D. determinations, plant and insect studies, fermentation, and bacterial culturing. Featuring a 4.0 cu. ft. chamber with mechanical convection, it ensures uniform air circulation and maintains precise temperature control from -10°C to 45°C. The incubator includes a digital temperature display, microprocessor control, CFC-free refrigerant, and an internal 1-amp outlet for powering small lab equipment, offering reliability and versatility for small-volume workloads.

Specifications:

Model: VWR Sheldon Model 2005 (Part # 9110567)

Capacity: 4.0 cu. ft. (113.3 L)

Temperature Range: -10°C to 45°C

Temperature Uniformity: ±0.5°C at ambient

Convection Type: Mechanical convection

Interior Dimensions: 16¾" W x 14½" D x 30½" H

Exterior Dimensions: 23½" W x 22" D x 33" H

Weight: 108 lb (49 kg)

Power Requirements: 220V, 50Hz, 400W

Refrigerant: CFC-free

Features: Microprocessor control, digital temperature display, auto defrost with floor drain, 1-amp internal outlet, one adjustable shelf

Comes with our 90-day warranty.

Biotech Equipment Sales, Inc.: based in South San Francisco, the Biotech capital of the world, since 2009. We are dedicated to bringing high-quality pre-owned laboratory instrumentation to our scientific community.
