Description

Maximum capacity and flexibility in a small footprint for laboratory glassware cleaning. These vertical SpaceSaver glassware washers deliver high-volume, reliable washing and drying of lab glassware in a compact design ideal for space-constrained laboratories. Independent microprocessor controls, flexible rack options, and efficient performance while using significantly less floor space than comparable-capacity units.

Key Features:

- Up to 33% smaller footprint than washers of similar capacity (vertical/stackable design).
- Single- or double-washing chamber models with up to four loading levels total.
- Independently microprocessor-controlled chambers for maximum throughput and flexibility.
- Premium 304 stainless steel construction for durability and corrosion resistance.
- Soft-touch controller with multiple cycle selections (e.g., rinse only, normal, daily, heavy wash, timed/custom options).
- Temperature selection up to 70 °C (158 °F) for optimal cleaning of different loads.
- Enhanced dual-fan drying system that helps prevent impurities and contamination.
- Noise-buffering insulation for quieter operation.
- High-efficiency water management system for energy and water conservation.
- Spindle-rack-ready options (on applicable models) plus included top/bottom stainless-steel open racks; compatible with a wide range of accessories; supplied with mounting feet and wheels.

Comes with our 90-day warranty.
